PRODUCT DATA INFORMATION

ISSUE NO. 8

EFFECTIVE OCT 2009

PAGE 1/1

1. **DESCRIPTION**

A polyether polyurethane foam which has a high load bearing capacity and provides optimum protection in packaging applications.

2. **TYPICAL PHYSICAL PROPERTIES**

Physical properties are measured using test methods described in the BS4443 series and BS EN ISO 845:1995.

Nominal piece density range	18-22 kg/m ³
Nominal CLD Hardness (40%)	6.5-8.0 kPa
Nominal tensile strength	100 kPa min.
Nominal elongation at break	100% min.
Nominal hardness range when measured according to ASTM D3574 – 03 Test B1 (Foam thickness 100mm)	75 - 95 lb force (25% compression)

3. **COLOUR**

Standard colour is Grey.
Colours other than the standard colour to be agreed between purchaser and supplier.

PACS reserve the right to update product data information without prior notice.
